

SNEAK PREVIEW

Imagic Unleashes 3 New Block Busters for the Atari® 2600

2 6350

SOLAR STORM™

The sun is exploding... showering heated fragments on your vulnerable planet. Fire at those descending foreign crafts with your ultra sonic laser ship. Some bounce off your solar shields and fire back. Survey your heat indicators and pulverize all attackers before your planet blows up.

Survive a wave of alien assaults and your view shifts to an orbital gun platform. Enemy flagships race past. Rotate the gun platform and fire. Then return to the planet to face an even tougher barrage of foreign foes.

Available now for the Atari 2600.

5730

MOONSWEeper™

Miners are trapped on Jupiter's moons. You're their only hope! Maneuver your ship, Moonsweeper, through outer space. Meteors hurtle past - avoid collision! Choose a moon and land if you can - or dare!

Once on a moon, navigate across the lunar surface. Towers loom up. Careful! One collision and you lose precious reserves. Radar shows where miners lie. Pick them up. But look out! Alien jets scream down on the moonscape! Fire! Accelerate, then take off for other moons and trickier trials.

Available for Atari 2600 in July.

1 153

3 235

FATHOM™

Discover Neptune's Trident! But how? As a magical seagull, flap your wings and fly for shore. Grab speeding clouds but beware! Blackbirds and erupting volcanoes thwart your every move. Find the Trident then head for the sea. Careful, danger lurks in the briny deep!

Take the plunge (screen not shown) and swing your fin as an enchanted dolphin. Snarl of seaweed and sinister octopuses keep you from touching precious seahorses. Keep diving - magic awaits in the ocean depths.

At the bottom, a mermaid appears, trapped in a mystical cage. Free her with the magical Trident.

Available for the Atari 2600 in August.
